COVID-19 Billing Guidance

New Hampshire Medicaid Fee-for-Service Pharmacy -Program

New Hampshire Fee-for Service Medicaid remains committed to ensuring New Hampshire Medicaid recipients receive medically necessary care during the 2019 novel coronavirus (COVID-19) state of emergency, including preventive services to reduce and slow the spread of the disease.

New Hampshire Fee-for Service Medicaid will be reimbursing Pharmacies at Point of Sale for COVID vaccines according to the dose of vaccine being administered.

The following guidance is being provided to answer questions about how pharmacies should submit claims for payment:

- Prescriber ID field should be populated with the pharmacist's type 1 NPI and the Prescription Origin Code field should be populated with '5 – Pharmacy'.

- NCPDP is recommending that pharmacies submit the claim with Submission Clarification Code (SCC) = 42, which means Prescriber ID Submitted is valid and prescribing requirements have been validated

- There will not be any ingredient costs associated with these vaccines at this time

- Pharmacies must submit a SCC = 2 (NCPDP Field # 420-DK) to receive an administration fee of $16.94 for the initial dose and a SCC = 6 (NCPDP Field # 420-DK) to be reimbursed an administration fee of $28.39 for the final dose of a series for two-dose vaccines. Pharmacies that do not utilize these fields will be reimbursed their normal dispensing fee for these products.

Pharmacies needing assistance may call the
Magellan Call Center at (866) 675-7755.

Sincerely,
Magellan Medicaid Administration, Inc.
