(Please indicate) State Agency: New Hampshire for FY: 2024

Caseload management involves identifying the target population and special populations within it, implementing strategies to enroll the potential population, and utilizing caseload effectively to reach the desired populations. Describe the procedures in place to implement these strategies.

During a disaster or public health emergency, or supply chain disruption, the State agency may request to implement existing WIC regulatory and programmatic flexibilities or waivers to support the continuation of Program benefits and services. State agencies should consider the overarching authority, i.e., Stafford Act, Access to Baby Formula Act, or provision(s) authorized by Congress, before developing a policy and procedure. The State agency must provide a detailed description of how it plans to operationalize the flexibility or waiver through their procedure manual where applicable. Please note the State Plan Guidance is not intended to capture a description of waivers authorized by Congress with separate reporting requirements.

Executive Order (EO) 13988, "Preventing and Combating Discrimination on the Basis of Gender Identity or Sexual Orientation." was issued to all Federal Agencies. The EO set out policies that all persons are entitled to dignity, respect, and equal treatment under the law, no matter their gender identity or sexual orientation. The EO does not usurp section 17 of 42 U.S.C, as amended or applicable regulations, rather it complements the language in the nondiscrimination statement. Following the contents of the EO, State agencies must update their policies and procedures to align with the contents of the EO and the nondiscrimination statement.
