Data for 2016 and 2017 are considered provisional and may change after yearly review of data.

YTD: Jan 1, 2017 through June 30, 2017.

nr = Not reportable in New Hampshire prior to November 3, 2016.

* Includes *Ehrlichia chaffeensis*, *Ehrlichia ewingii*, and undetermined *Ehrlichia* /*Anaplasma* species.

¶ Includes O157:H7.

£ The number of cases of Lyme disease in 2014 and 2015 were estimated based on the number of reports received and historical data.

§ One case of human rabies reported in 1996.

‡ Includes all stages of Syphilis infection.

¥ The criteria for reporting Hepatitis B infection in New Hampshire was changed in 2016. Due to this change, comparison of data between 2017 and prior years is not recommended.

Note: All the data in this report are based upon information provided to the New Hampshire Department of Health and Human Services under specific legislative authority. The numbers reported may represent an underestimate of the true absolute number and incidence rate of cases in the state. Any release of personal identifying information is conditioned upon such information remaining confidential. The unauthorized disclosure of any confidential medical or scientific data is a misdemeanor under New Hampshire law. The department is not responsible for any duplication or misrepresentation of surveillance data released in this report. Case counts by year are based on morbidity date, which is the date closest to onset of illness and may represent date of onset, date of diagnosis, or date of report, whichever is earliest. Case counts may not exactly match data published yearly by the Centers for Disease Control and Prevention. Data are complete as of July 17, 2017. Data prepared by Erin Metcalf, MPH, 603-271-4987, erin.metcalf@dhhs.nh.gov
