

Ebola Virus Disease (EVD) Screening for EMS

1. Travel to West Africa (Guinea, Liberia, Sierra Leone, or other countries where EVD transmission has been reported by WHO) within 21 days (3 weeks) of symptom onset.

AND

2. **Any of the following symptoms:** Fever, severe headache, muscle pain, vomiting, diarrhea, abdominal pain, fatigue or unexplained hemorrhage.

If both criteria are met, isolate the patient and don recommended PPE before any further contact with the patient or their environment. Keep a list of all first responders on scene.

IMMEDIATELY Report Person Under Investigation for Ebola to:

1. Receiving Facility
2. State Public Health Authorities: NH Division of Public Health Services, Bureau of Infectious Disease Control at 603-271-4496 (after hours 1-800-852-3345, x5300).
