

Voluntary Credentialing and Accreditation Recommendations for New Hampshire Local Health Officers

NH Local Health Officials
Standards and Workforce Competencies
Advisory Committee

Presented by Kevin Flanagan, MPH

Public Health
Prevent. Promote. Protect.

Phoenix Public Health Solutions, LLC

Background

- Project defined the work of local health officers
- Consensus on scope of local health officer roles and responsibilities used to develop model of education, experience, and preparation to base voluntary credentialing of local health officers on
- Project linked to generally accepted national models and standards, also to common elements in the duties/work of NH local health officers
- Lead to development of a voluntary certification system based on accepted standards

Background

- Accreditation and credentialing of public health workers and local public health agencies has become a national movement
- Endorsed by leading public health authorities:
 - American Public Health Association
 - National Association of Local Boards of Health
 - Association of State and Territorial Health Officers
 - National Association of County and City Health Officials
 - Centers for Disease Control and Prevention
 - Robert Wood Johnson Foundation

Background

In 2007, New Hampshire received funding from the Robert Wood Johnson Foundation under its Multi-State Learning Collaborative Project to:

Improve the quality of public health practice by articulating workforce standards and competencies and planning for a tiered approach to credentialing/accreditation for local public health professionals and agencies

Background

- New Hampshire has centralized State health authority, including appointment authority over town health officers
- State statute requires appointed health officer in every municipality (RSA Chapter 128)
- ***New Hampshire residency only “credential” required***
 - ***no educational and experience requirements***
- Public health at local level has changed much since enactment of statutes that created health officer role over 100 years ago
- However, little has been done to define roles and responsibilities within current public health system

Health Officer Responsibilities

- Enforce New Hampshire public health rules and regulations
- Serve as liaisons between state officials and local community on local public health issues
- Inspect foster homes, day care facilities, septic systems, nuisance complaints – garbage
- In self-inspecting communities inspect food establishments
- Involved with food borne and communicable disease outbreaks
- Involved in any issue that impacts public health of community

Health Officer Roles During Public Health Emergency

- Work within the Incident Command System and become trained in the ICS structure
- Assist DHHS in public education efforts, including identifying audiences and methods to disseminate educational materials

Infrastructure Challenges

- Inconsistency of payment for Health Officers
- Health Officers wear many “hats”
- ***Inconsistency of educational backgrounds***
- Inconsistency of types of public health issues
- No state requirements for certification for Health Officers
- Moderate turnover of Health Officers

Voluntary Accreditation and Credentialing Recommendation Process

- Proposed project presented at 2007 NH Health Officers Association Conference
- Volunteers to participate in Credentialing Advisory Committee sought from body of Health Officers Association
- 22 member multi-stakeholder Local Health Officials Standards and Workforce Competencies Advisory Committee convened monthly over 10 month period

Health Officer Needs

- ***Identified training was one of the most important services they needed***
- Indicated need for support from their local Boards of Selectmen in regards to enforcement issues
- Increased training opportunities
- Increase communications between Health Officers and State agencies
- Increase use of the Internet as a means of communication for Health Officers
- Increase amount of regional trainings available to Health Officers throughout the state

Local Health Officials Standards and Workforce Competencies Advisory Committee *Stakeholder Groups*

- New Hampshire Health Officers Association
- New Hampshire Division of Public Health Services
- University of New Hampshire Department of Health Management and Policy
- Community Health Institute – John Snow Institute
- New Hampshire Public Health Networks
- New Hampshire Local Government Center
- New Hampshire Public Health Association
- Manchester Health Department
- Nashua Community Health Department
- New Hampshire Institute for Health Policy & Practice
- Town of Derry Bureau of Public Health
- Phoenix Public Health Solutions

Voluntary Accreditation and Credentialing Recommendation Process

- Researched current public health standards and certifications
- Identified local public health agency roles, responsibilities and capacities to deliver 10 Essential Services of Public Health
- Developed voluntary credentialing standards for local health officers
- Recommended creation of formal accreditation oversight body
- Developed plan to promote voluntary local public health agency accreditation and credentialing process

Committee Recommendations

“Voluntary credentialing standards for local health officers”

- Adoption of a model of voluntary credentials for health officers at two levels:
 - ***Certified Health Officer I***
 - ***Certified Health Officer II***

Voluntary Credentials - Certified Health Officer I

Programs and Services Provided

- Child care, foster care, and other facility inspections required by State statute or regulation
- School inspections

- Registered Environmental Health Specialist

Voluntary Accreditation and Credentialing

Outcome Objectives:

1. Better understanding of the work of New Hampshire local health officers within the public health system
2. Targeted training and educational offerings to enable health officers to attain recommended standards
3. Clearer career growth path for NH health officers
4. More uniform public health services provided by local health officers
5. *Uniform credentials could lead to inter-municipal agreements for health officer services, **reducing local costs and ensuring competency** of local health agency to protect public health*

Recommendation on Oversight of Credentialing Process

- Establishment of oversight committee with varied local public health interests
- Appointed by Commissioner of NH Department of Health and Human Services
- Committee responsibilities to include:
 - Promote and facilitate attainment of voluntary credentials, and related training, by local health officers
 - Develop accreditation application process
 - Review applications and make credentialing determinations
 - Recommend recognition of health officers meeting appropriate credentials to the Commissioner of DHHS

Accreditation Oversight Committee Membership:

- **Two Representative of New Hampshire Health Officer's Association**
- **Division of Public Health Services Health Officer Liaison**
- **New Hampshire State Epidemiologist or Designated Representative**
- **Representative of NH Department of Environmental Services**
- **Representative of New Hampshire Local Government Center**
- **Representative of the New Hampshire Public Health Association**
- **Representative of University of New Hampshire MPH Program**
- **Representative of Dartmouth Medical School MPH Program**
- **Four at-large members chosen by the Commissioner of NH DHHS**
