

Substance Use Disorder Provider Types

There are six Substance Use Disorders (SUD) Provider Types, numbered 1-6 below. In addition, existing Medicaid provider types, lettered from A to D below, are able to provide some SUD services. Any service provided must be within the provider's scope of practice and is subject to all applicable administrative rules.

1) Individual MLADCs are individuals licensed by the New Hampshire Board of Licensing for Alcohol and Other Drug Use Professionals (LADC Board) as a Master Licensed Drug and Alcohol Counselor (MLADC) who are in an independent private practice. Individual MLADCs are likely to be able to provide: Substance Use Screening; Individual, Group and Family Substance Use Counseling; Crisis Intervention; Assessment; and Continuous Recovery Monitoring.

2) Group MLADCs are individuals licensed by the LADC Board as an MLADC who are working in a group private practice. Group MLADCs are likely to be able to provide: Substance Use Screening; Individual, Group and Family Substance Use Counseling; Crisis Intervention; Assessment; and Continuous Recovery Monitoring.

3) Individual LADCs* are individuals licensed by the New Hampshire Board of Licensing for Alcohol and Other Drug Use Professionals (LADC Board) as a Licensed Alcohol and Drug Counselor (LADC) and who are permitted to engage in independent practice in accordance with Chapter Law 189:2, II, Laws of 2008, and Chapter Law 249:24, V, Laws of 2010. Individual LADCs are in an independent private practice. Individual LADCs are likely to be able to provide: Substance Use Screening; Individual, Group and Family Substance Use Counseling; Crisis Intervention; Assessment; and Continuous Recovery Monitoring.

**This provider type must check with the Managed Care Organizations (MCO) for their enrollment requirements.*

4) Group LADCs* are individuals licensed by the New Hampshire Board of Licensing for Alcohol and Other Drug Use Professionals (LADC Board) as a Licensed Alcohol and Drug Counselor (LADC) and who are permitted to engage in independent practice in accordance with Chapter Law 189:2, II, Laws of 2008, and Chapter Law 249:24, V, Laws of 2010. Group LADCs are in a group private practice and are likely to be able to provide: Substance Use Screening; Individual, Group and Family Substance Use Counseling; Crisis Intervention; Assessment; and Continuous Recovery Monitoring.

**This provider type must check with the Managed Care Organizations (MCO) for their enrollment requirements.*

Substance Use Disorder Provider Types, *continued*

5) Outpatient Substance Use Disorders Programs are SUD treatment agencies who provide outpatient services only. Outpatient Substance Use Disorders Programs are likely to be able to provide: Medically Monitored Withdrawal Management (Ambulatory); Individual, Group, and Family Substance Use Counseling; Intensive Outpatient Services; Partial Hospitalization Services; Crisis Intervention; Assessment; Peer and Non-Peer Recovery Support Services; and Continuous Recovery Monitoring.

6) Comprehensive Substance Use Disorders Programs are SUD treatment agencies that provide residential and outpatient services. Comprehensive Substance Use Disorders Programs are likely to be able to provide: Medically Monitored Withdrawal Management (Ambulatory and Non-Hospital Residential); Individual, Group, and Family Substance Use Counseling; Intensive Outpatient Services; Partial Hospitalization Services; Specialty Residential Treatment Services for Pregnant & Parenting Women and their Children; Low, Medium, and High Intensity Residential Treatment Services; Crisis Intervention; Assessment; Peer and Non-Peer Recovery Support Services; and Continuous Recovery Monitoring.

Existing Medicaid Provider Types Able to Provide Some SUD Services
