

**New Hampshire Department of Health and Human Services
Building Resilience Against Severe Weather
And Climate Effects
RFP-2018-DPHS-19-BUILD**

ADDENDUM #1

On January 2, 2018, the New Hampshire Department of Health and Human Services published a request for applications, requesting applications from Regional Public Health Networks for the development of a plan of action to reduce the public health effects on local populations that result from severe weather events and seasonal climate threats effecting communities.

The Department is publishing this addendum to:

- 1. Add Attachment #1: A Workbook Guide on Climate and Health Adaptation for Regional Public Health Networks.**
