**Purpose:** The NH Drug Monitoring Initiative (DMI) is a holistic strategy to provide awareness and combat drug distribution and abuse. In line with this approach the DMI will obtain data from various sources (to include, but not limited to, Public Health, Law Enforcement, and EMS) and provide monthly products for stakeholders as well as situational awareness releases as needed.

Overview: Trends for EMS Narcan Incidents, Opioid Related ED Visits, Treatment Admissions, and Overdose Deaths:

EMS Narcan Administration, Opioid Related ED Visits, and Treatment Admissions per 100,000 Population
September 2016 - August 2017

Drug Overdose Deaths By Year
Data Source: NH Medical Examiner’s Office

* 2017 Numbers are based on analysis as of 19 September 2017 - 101 Cases Pending
Drug Overdose Deaths:
Data Source: NH Medical Examiner’s Office

Trends:
- At this time, drug overdose deaths are projected to decrease by 5% from 2016 to 2017.
- In 2017 thus far, Hillsborough County has the highest suspected drug use resulting in overdose deaths per capita at 2.35 deaths per 10,000 population.
- Strafford County had the next highest suspected drug use resulting in overdose deaths per capita at 1.91 deaths per 10,000 population.
- The age group with the largest number of drug overdose deaths is 30-39 which represents 27% of all overdose deaths for 2017.
- As released by the Attorney General’s Office on 12 July, 2017 there have been 10 deaths related to the use of carfentanil in 2017.

*** IMPORTANT DATA NOTES***
- 2017 Numbers are based on analysis as of 19 September 2017.
- There are currently 101 cases “pending toxicology” for 2017.
- Analysis is based on county where the drug (s) is suspected to have been used.

*Location where the drug(s) is suspected to have been used.

- 1 - 4
- 5 - 10
- 11 - 25
- 26 - 50
- 51 and greater
Trends:
- EMS Narcan administration incidents decreased by 18% from July to August.
- In August Belknap County had the most EMS Narcan administration incidents per capita with 5.30 incidents per 10,000 population.
- Based on absolute numbers Hillsborough County had the most Narcan incidents with 96 incidents in August.
- The age group with the largest number of EMS Narcan administration incidents is 20-29 which represents 31% of all EMS Narcan administration incidents for August.
- NH Bureau of EMS “lives saved” has decreased by 31% from July to August. However, as indicated above the total number of narcan administrations incidents also decreased.

*** IMPORTANT DATA NOTES***
- Narcan data in this report involves the number of incidents where Narcan was administered, NOT the number of doses of Narcan during a certain time period. Multiple doses may be administered during an incident.
- Narcan is administered in cases of cardiac arrest when the cause of the arrest cannot be determined. It therefore cannot be concluded that all of the reported Narcan cases involved drugs.

RODS, or Revised Over Dose Score is based on the combined delta of documented respiratory rate (RR) and Glasgow Coma Score (GCS - measure of alertness) before and after Narcan administration. For example, RR improved from 6/min to 12/min (delta of 6) and GCS improved from 10 to 13 (delta of 3), the RODS score would be 9. The delta of the vital signs is calculated per incident, so the patient may have received more than one dose of Narcan to achieve the effect in the RODS.

**Opioid Related Emergency Department Visits:**
*Data Source: NH Division of Public Health Services*

**Trends:**
- Opioid related ED visits increased by 4% from July to August 2017.
- In August, residents from Merrimack County had the most opioid related ED visits per capita with 6.97 visits per 10,000 population.
- Hillsborough County had the second highest number of opioid related ED visits per capita with 6.48 visits per 10,000 population.
- The age group with the largest number of opioid related ED visits is 20-29 which represents 37% of all opioid related ED visits for August.

***IMPORTANT DATA NOTES***
- County represents where the opioid use patient resides.
- These data represent any encounter with the term “heroin, opioid, opiate, or fentanyl” listed as chief complaint text. These data also represent any encounter with an ICD-10 code that was designated for heroin and opioids.
- Currently all but two of the hospitals are sending ICD-10 data.

**Trends:**
- Opioid/opiate, Methamphetamine, & Cocaine/Crack treatment admissions decreased by 12% from July to August.
- In August residents from Belknap County were admitted most often for opioid/opiate treatment per capita with 2.81 admissions per 10,000 population.
- More males than females were admitted to treatment programs in July for opioid/opiate, Methamphetamine, & Cocaine/Crack use.
- Methamphetamine treatment admissions decreased by 31% from July to August.
- Cocaine/Crack treatment admissions increased by 43% from July to August.
- Heroin/Fentanyl treatment admissions decreased by 16% from July to August.

***IMPORTANT DATA NOTES***
- County represents where the patient resides.
- These data represent treatment admissions to state funded facilities.

Situational Awareness:

**Health and Human Services Secretary Price Announces Funding for Mental Health and Opioid Services**

On September 14, U.S. Health and Human Services Secretary Tom Price made a quick trip to New Hampshire to announce $200 million in federal grants targeting community health centers, to increase access to mental health and opioid abuse services.

Ten New Hampshire recipients—nine health centers and the City of Manchester—are set to receive about $175,000 each as part of the grant program.

Price said this is just one of several steps the Trump administration plans to take as part of a national effort to address the opioid crisis.

“We didn’t get into this challenge overnight, it’s taken a long, long time—decades literally—so we’re not going to solve it overnight, but what we must do is raise the visibility of it and work on the kinds of things that will get us to a solution.” Price said. “That’s what the president has challenged us to do, and others within his administration, and we’re coming forward—I hope in short order—with some recommendations for him to consider.”

Officials at Goodwin Community Health say they plan to put part of its new federal grant toward capital improvements, building out space for mental health and substance misuse treatment. Some is also going toward hiring a psychiatrist and recovery support workers.

**Nashua ‘Safe Stations’ :900+ Opioid Addicts Helped**

The Nashua Safe Station program, which connects opioid addicts with recovery help at city fire stations, recently reached another milestone. As of the middle of September, the program has served more than 900 people since launching in November. The program appears to be having a positive effect. In the first quarter of this year, overdoses dropped 34 percent compared to 2016, according to AMR Nashua.
