

DHHS–BDAS Episode of Care Guidance

Contracted Treatment & Recovery Support Services

An episode of care is a client treatment event that should encompass all of the levels of care that a client engages in at an agency in a given time period. As the client progresses through various levels of care, the old program enrollment should be closed and a new program enrollment should be created within the episode of care. When the client completes care with an agency, the episode of care is ended.

WITS Program Enrollments
