| Mike Bradley               | • Long term intensive treatment & prevention  
• Medication-Assisted Treatment (MAT) for those incarcerated & those leaving  
• Improve process to grant reciprocity for providers from out-of-state  
• Loan repayments  
• Make greater use of Certified Recovery Support Workers (CRSWs)                                                                 | Treatment, Prevention Workforce, Recovery |
| Mental Health Center of Greater Manchester |                                                                                                                                                                                                         |                                          |
| John Burns                 | • Recovery housing  
• Encourage collaboration between peer recovery supports & services (PRSS) staff & other providers  
• Opportunities to use PRSS in corrections (prior to release) & drug courts  
• Employment opportunities for people in recovery  
• High school & college level peer recovery programs  
• Better use of telehealth, mobile, VNA resources in rural areas  
• Transportation                                                                 | Treatment, Recovery                       |
| SOS                        |                                                                                                                                                                                                         |                                          |
| Patty Crooker              | • Mobile resources  
• Detox services  
• Recovery housing  
• More CRSWs & case managers  
• PRSS in hospitals/EDs  
• Provide more education to probation/parole, law enforcement, EMS, public works, others  
• Funds for those without other insurance coverage to access needed services & supports  
• Increase access points to more towns                                                                 | Treatment, Recovery Workforce, Education Flex Funds, Access |
| Nashua                     |                                                                                                                                                                                                         |                                          |
| Corinne Dodge              | • Fund services for all without coverage  
• Allow use of non-medical models  
• Strong government oversight necessary for all programs & policies  
• Detox services  
• Residential treatment  
• Sober housing  
• Funds for evidence based practices & other provider models                                                                                                                                 | Treatment, Recovery General, Funding     |
| Self                       |                                                                                                                                                                                                         |                                          |
| Sharon Drake               | • Competitive wage packages to attract more licensed clinicians  
• More dually-licensed providers  
• More access to doctors & psychologists, especially for MAT  
• GPRA is time-consuming - need funds for staff                                                                                                                                 | Workforce, Data Collection               |
<p>| Southeastern NH Services   |                                                                                                                                                                                                         |                                          |</p>

| Diane Fonteneau          | Seacoast Mental Health Center         | • More funds to agencies contracted in 16/17 to stand up MAT services so that they can continue to build staff capacity  
• More funding (number of agencies operating in the red or on the edge)  
• GPRA is a burden                                                                                                                                     | Funding, Data Collection             |
| Cameron Ford             | Headrest                              | • Allow agencies to partner across current provider systems  
• Disciplined, comprehensive work ready programs for people in recovery - employment  
• Expand residential treatment  
• Recovery housing  
• Enhance counseling & resources  
• Better education for providers                                                                                                                                                      | General, Treatment Recovery         |
| Deb Geiger               | New Life Home for Women and Children  | • Allow faith-based services  
• Detox for women                                                                                                                                                                                              | Treatment, Recovery                  |
| Matthew Houde            | Dartmouth-Hitchcock                   | • Capacity building for provider & caregivers                                                                                                                                                                | Workforce                            |
| Mark LeFebvre            | SOS                                   | • Mobile treatment & recovery services  
• Lack of access to RCOs & services  
• Transportation  
• Mobile MAT services  
• Trauma informed care - Adverse Childhood Experiences (ACEs)                                                                                                                                 | Treatment, Recovery                  |
| Tim Lena                 | Governor's Commission Prevention Task Force | • Sure up community coalition work  
• Community programs  
• (?) T-I schools  
• Compassion fatigue for first responders  
• Anyone. Anytime. campaign  
• Safe storage & disposal programs  
• Partnership for Drug Free NH  
• Youth - Teen Institute; Granite State Youth Alliance; drug-free coalition  
• Recovery Friendly Workplace Initiative  
• Education for doctors - addiction in general; safe prescribing practices                                                                                                                                 | Workforce, Prevention                |
| Theresa McCafferty       | Sobriety Centers of NH                | • Consider waiver to allow provision of medically-monitored treatment  
• Counties not turning insurance coverage back on when individuals leave corrections facilities  
• Some housing programs won't accept those using suboxone - consider them to be "using"                                                                                                                   | Treatment, Recovery, Workforce, General |
### NH Department of Health and Human Services
**Public Input Session on State Opioid Response Funding Opportunity**
**Monday, July 23, 2018**

| **Ken Norton**  
**NAMI-NH** | **Treatments**  
**Recovery, Workforce, General** |
| --- | --- |
| • Need better reimbursement rates  
• Allow staff recruitment & utilization of staff to provide non-evidence-based practices  
• Loan repayments - don’t require interest payments for those working to fulfill licensing requirements | |
| • Co-occurring disorders (COD) overlap systems - need programs & training for COD  
• Allow peers to deal with COD  
• Train peers to address COD  
• Screening & referral to MAT for those in Ends waiting for NHH beds  
• Screening & referral to MAT for those in corrections facilities  
• Supports for families  
• Grief support  
• Compassion fatigue for providers & recovery coaches  
• Prepare crisis call centers to deal with overlap of suicide & drug overdose - develop a unified call center  
• Parity | |

| **Cheryle Pacapelli**  
**Harbor Homes**  
**PRSS Facilitating Organization** | **Data Collection, Workforce, Recovery, Flex Funds, General Prevention, Treatment** |
| --- | --- |
| • Administrative burden may be opportunity to collaborate across providers - who "has" individual at intake - 3 months - 6 months?  
• Doesn’t make sense for those in recovery  
• Staffing needs  
• Recovery housing - develop money follows the person model  
• Recovery housing - need standards & oversight  
• RCOs to work with those who are justice involved & drug courts; child/parent reunification; women & children; provide recovery coaching in home  
• Flexible barrier reduction fund to address needs, for example, bus pass, MAT costs  
• Utilize Recovery Capital Index  
• Syringe exchange programs  
• Harm reduction  
• Safe Stations | |

| **Sandra Pascucci**  
**Nurse** | **General, Recovery** |
| --- | --- |
| • Utilize Recovery Capital Index  
• Grassroots statewide collaboration of recovery residences  
• Support Addition Policy Forum  
• Support Continuum of Care facilitators  
• Funds for initial rent payments | |
