Electronic Visit Verification (EVV) Feedback Sessions

What is Electronic Visit Verification?

Electronic Visit Verification, or EVV, is a requirement under the [21st Century Cures Act](#), where states must implement an electronic system to verify that personal care and home health services were delivered to continue receiving full federal financial support toward those services.

States can select and implement their own EVV design. However, the EVV system must verify the following:

Stakeholder Engagement through EVV Feedback Sessions:

A focus area of the New Hampshire DHHS Electronic Visit Verification (EVV) project revolves around providing ample opportunities for stakeholder engagement. This is to ensure a well-rounded and thorough discussion of EVV has taken place with a wide range of community partners.

Through the EVV Feedback Sessions, information will be shared regarding EVV and the plan for implementation within New Hampshire. The intent of these sessions is to:

- Garner feedback/input regarding EVV implementation
- Receive questions
- Provide clarifications regarding EVV

UNH-IOD will host five virtual EVV Feedback Sessions in June 2020. One of the five sessions will offered specifically for families. ***Due to COVID-19, all EVV Feedback Sessions will be held remotely using a call-in option or video conferencing (Zoom).*** [Please note that registration will be required as an added security precaution. Click on the meeting link below to register. Once registered, the information for the meeting will be emailed to you.](#)
