Child Protection Central Intake Data

Weekly Calls to Intake: Comparing 2018 - 2020, Weeks 10 - 21

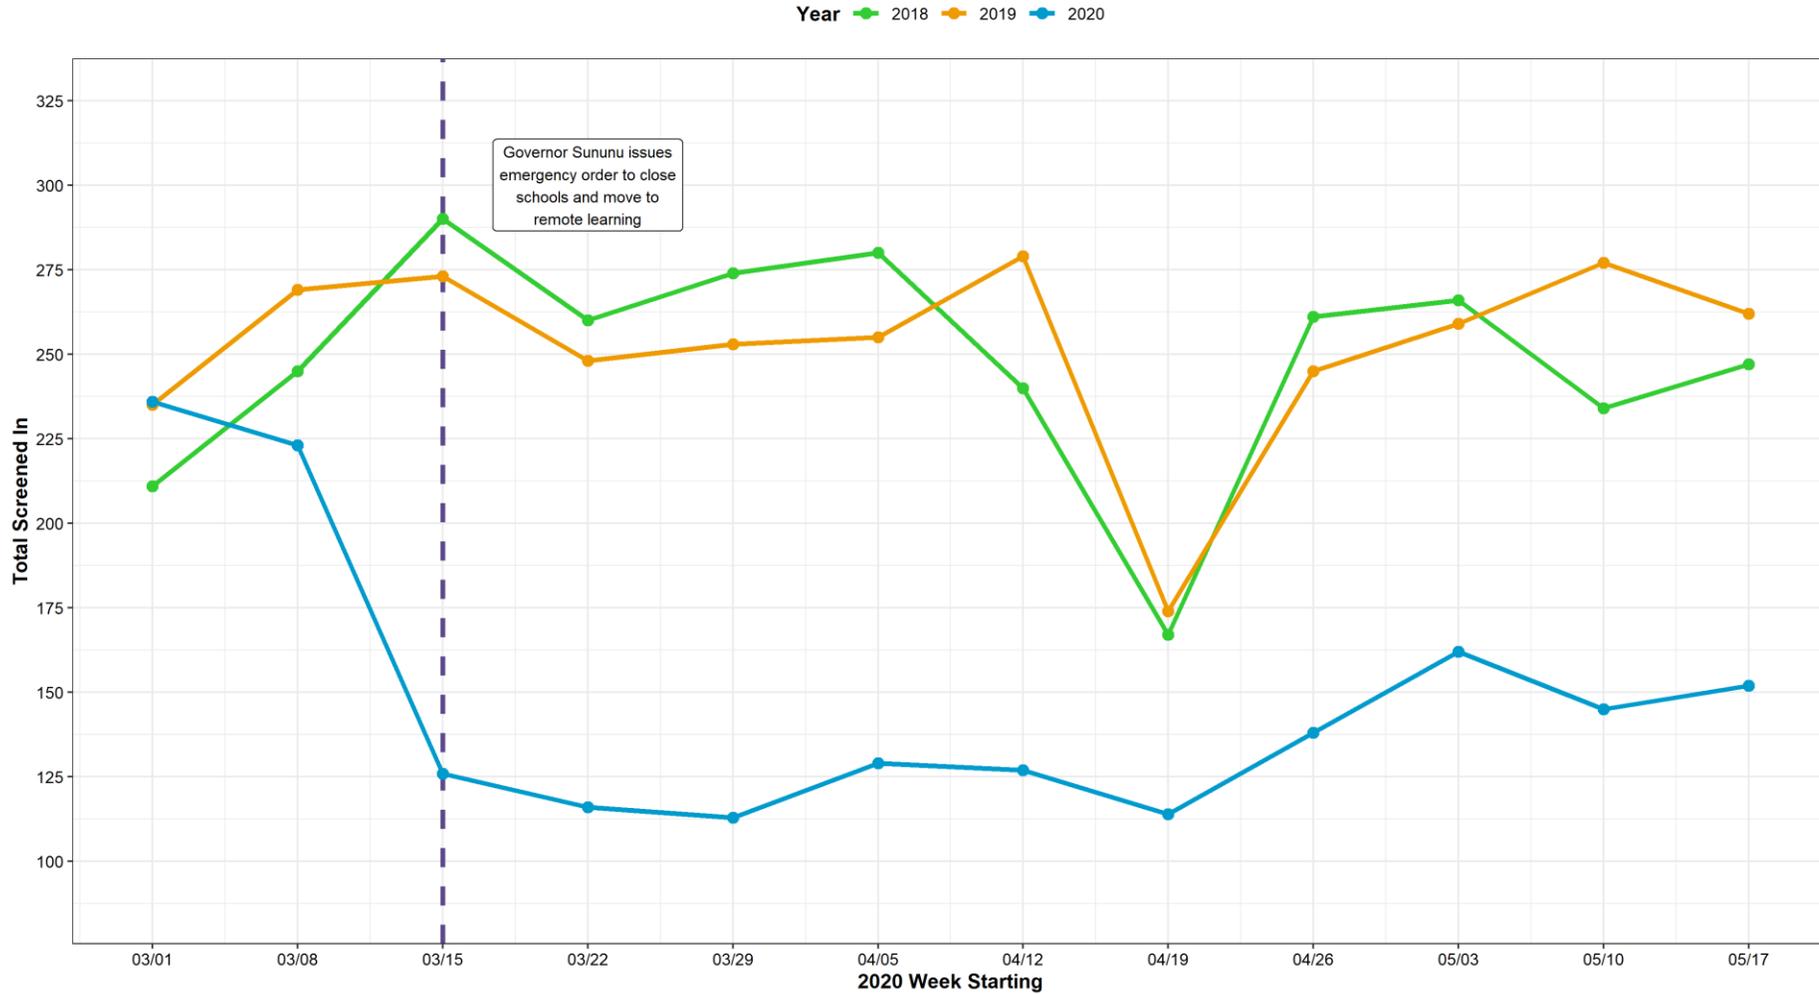

Reports to DCYF Central Intake have remained fairly consistent throughout the month of May and slightly higher than March and April.

Extracted from Bridges (SACWIS) on 2020-05-26

Screened In Referrals (accepted for further assessment)

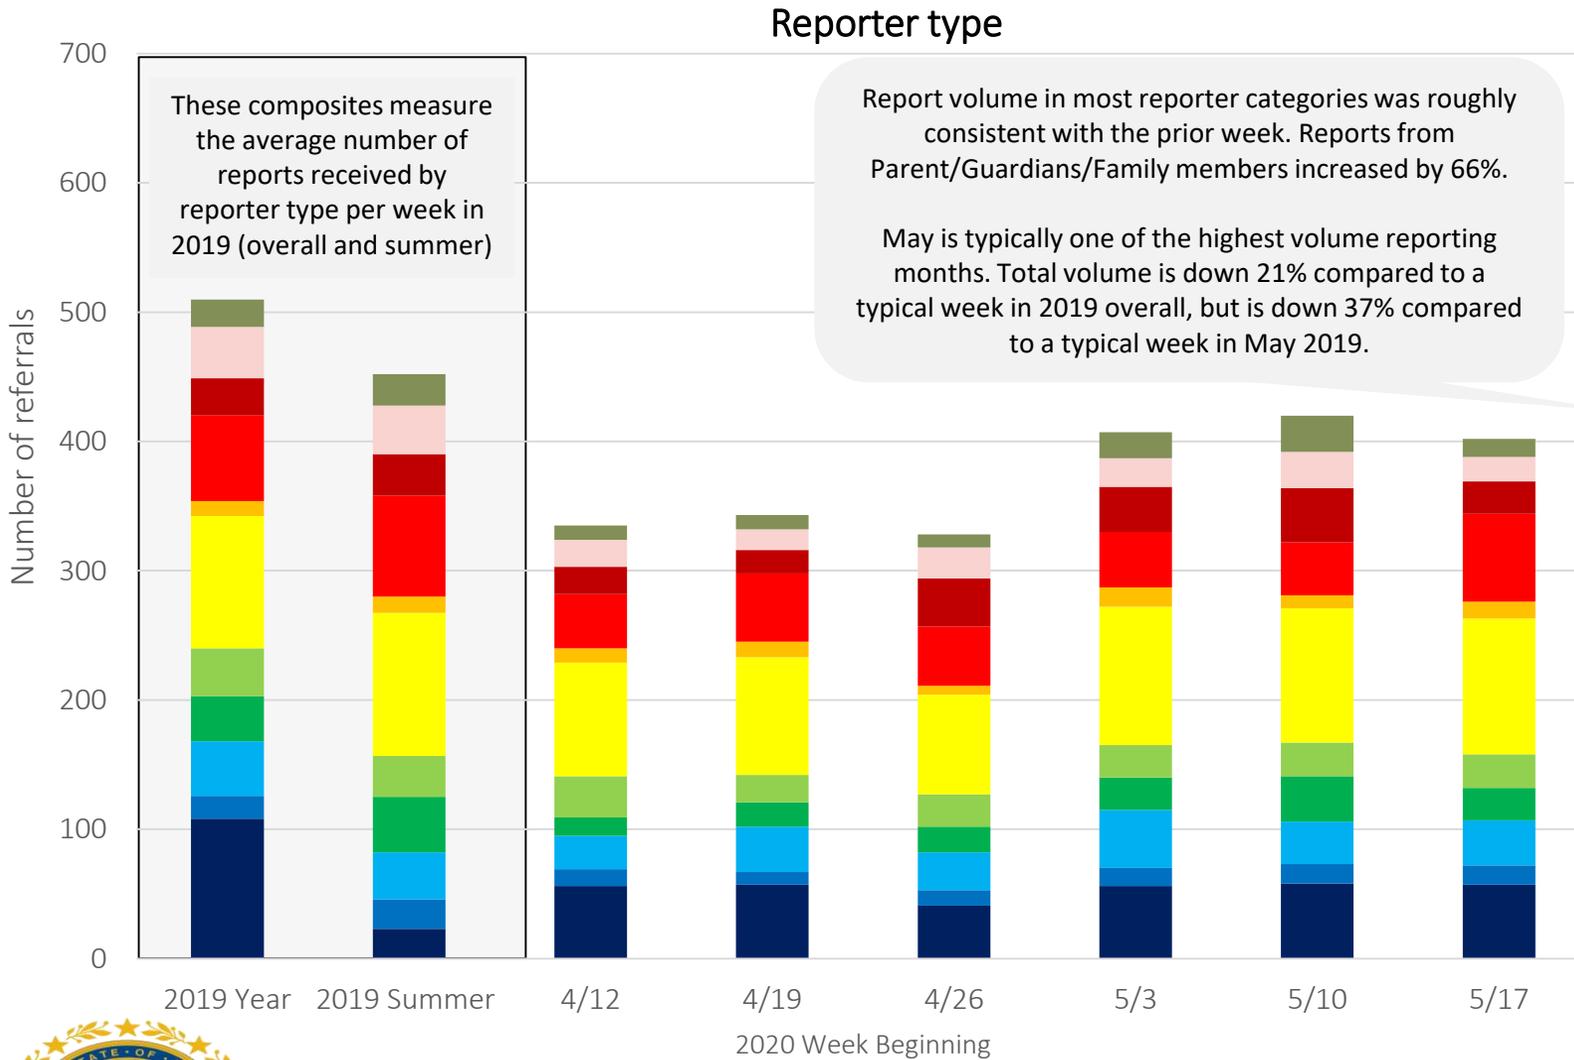

Weekly Screened In Referrals: Comparing 2018 - 2020, Weeks 10 - 21
Based on Referral Date

Extracted from Bridges (SACWIS) on 2020-05-26

Child Protection Referrals by Reporter Type (Preliminary)

Change in number of reports by reporter category for most recent week

Category	% change from overall composite	% change from weeks of 5/10 to 5/17	# from week of 5/17
School/Childcare	-47%	-2%	57
CPSW	-16%	0%	15
Mental Health	-17%	6%	35
Other	-27%	-31%	25
Social Worker (incl. school social workers)	-30%	0%	26
Law Enforcement	3%	-1%	105
Court/Probation/GAL	13%	30%	13
Parent/Guardian/Family	3%	66%	68
Anonymous/Unknown	-12%	-39%	25
Medical	-52%	-32%	19
Other Comm. Agency	-34%	-50%	14
Total	-21%	-5%	402

Why this matters: tracking referrals by reporter helps us monitor the impact of COVID-19 on our reporting network and identify groups we could activate to look out for kids and support families

NH Department of Health & Human Services
Division for Children, Youth & Families

Frequency of allegations (biweekly): since COVID-19 emergency began, allegations of caretaker substance abuse and domestic violence have increased. There has been a spike in reports containing lack of supervision over the last four weeks.

% of Screen-ins that contain allegation (biweekly): subset of top categories

Why this matters:
COVID-19 may lead to increased incidence of certain types of abuse and neglect. Tracking these data will allow us to adjust our practices and respond to these trends.

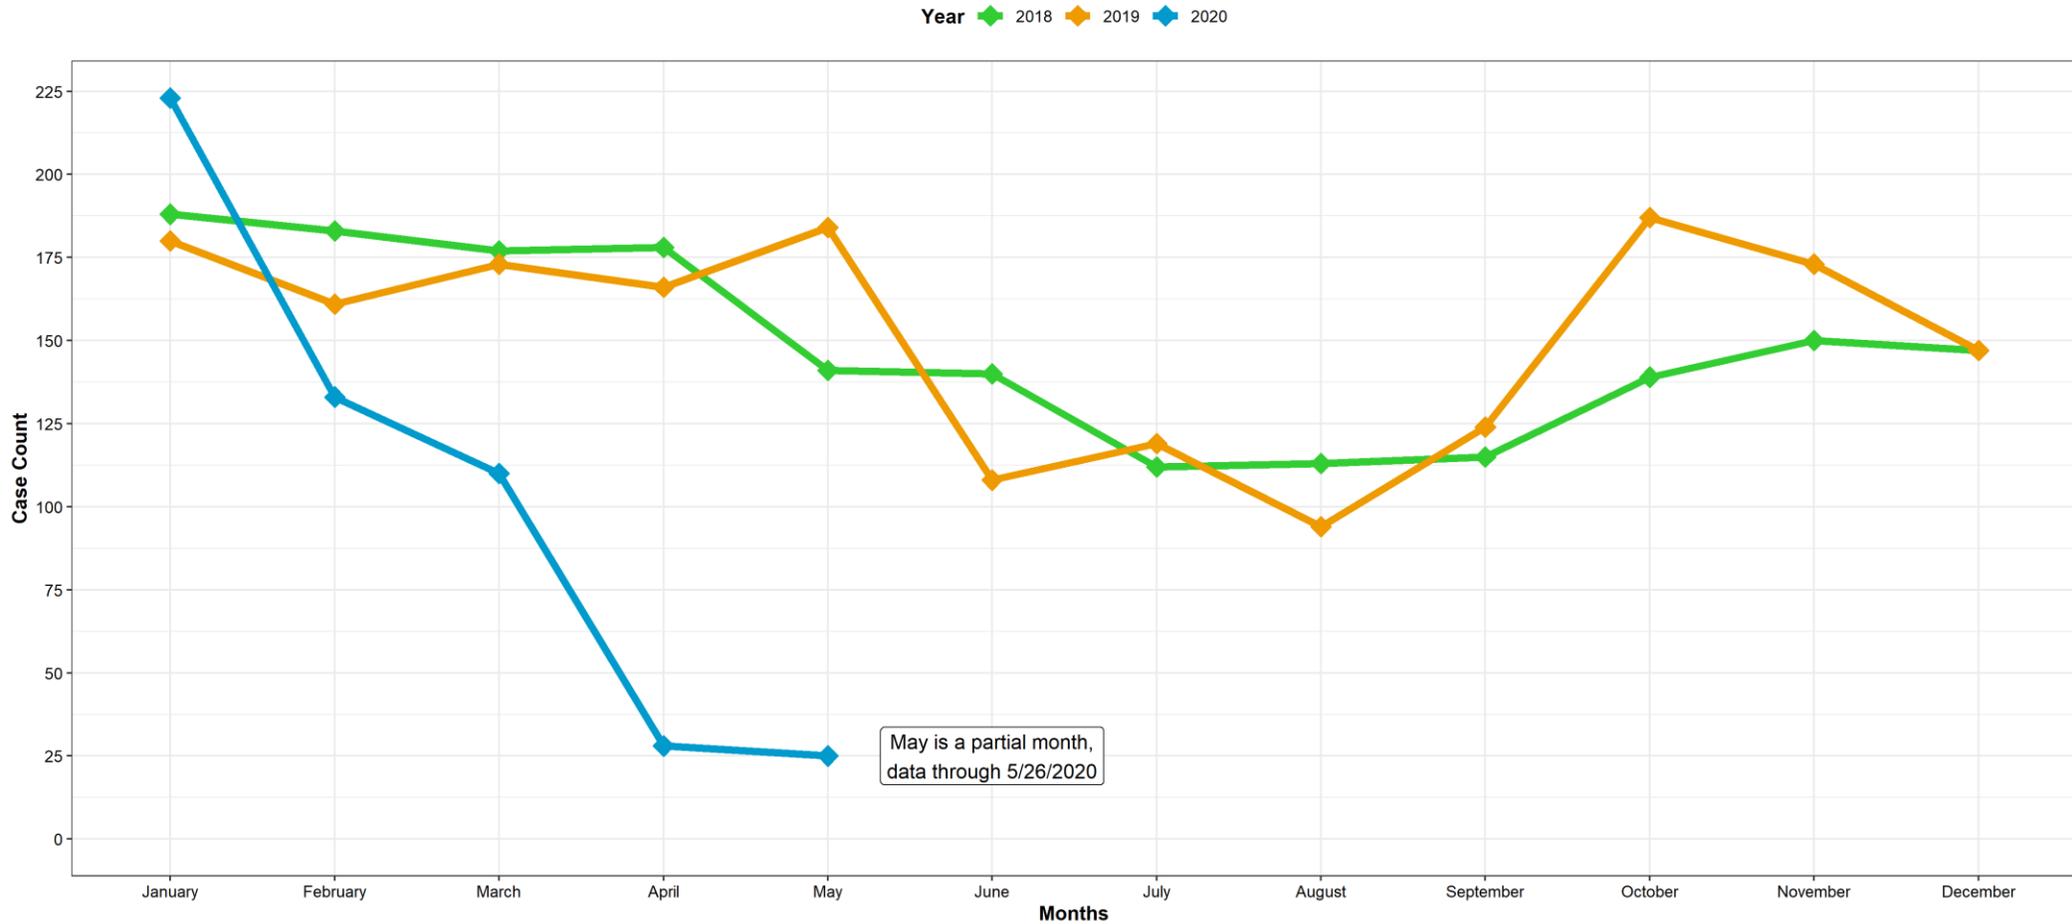

Note: 6-month composite calculated for biweekly basis from data from September 1, 2019 to February 29, 2020. Top allegation types displayed above, accounting for 67% of all allegations. Share is calculated by counting the number of screen-ins that an allegation type appears in and dividing by total number of screen-ins for the period. Allegations were only counted once per screen-in so as to not measure duplicate allegations within the same referral (e.g., allegations of inadequate basic care against two parents in one referral only count as one allegation in the chart above).
