
NH Oral Health Program

Education • Prevention • Treatment

New Hampshire Department of Health and Human Services

Division of Public Health Services

29 Hazen Drive, Concord, NH 03301

(603) 271-4568

Dear Parents,

A healthy mouth is part of a healthy body. The New Hampshire Oral Health Program strongly supports dental programs at school, Head Start, and WIC. These programs may:

- Teach children how to care for their teeth.
- Check teeth, mouth and gums for possible problems.
- Seal back teeth to prevent cavities.
- Apply decay-stopping fluoride to help stop a cavity from getting bigger and to make it feel better.
- Make referrals to let parents know their child needs to be checked or treated by a dentist.

These dental programs help children grow up with healthy teeth. They do not take the place of care at home and at dental offices.

Sincerely,

Dr. Sarah Finne, NH DHHS

Dental Director

Hope Saltmarsh, NH DHHS

Oral Health Program Director
