NH DHHS Daily Update on COVID-19 – March 11, 2020

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update for March 11, 2020, on the new coronavirus, COVID-19. DHHS will continue to issue COVID-19 updates each day to provide media and the public with current information about the State's efforts.

What's New

DHHS is closely monitoring the global COVID-19 outbreak and emerging science in order to minimize the impact to the health of our population, including rapid identification, isolation, and testing of people with suspect COVID-19. DHHS is issuing the following updated guidance for our communities.

- **DHHS Expands Testing Capacity for COVID-19**

The State Public Health Laboratories (PHL) has increased its COVID-19 testing capacity after receiving additional testing supplies from the U.S. Centers for Disease Control and Prevention (CDC). The additional supplies will allow the PHL to test an additional 250 people who have been determined to qualify for testing.

- **NH Insurance Department Mandates Coverage for COVID-19 Testing**

The New Hampshire Insurance Department has issued an [order](#) requiring New Hampshire insurers to cover costs associated with testing for COVID-19 without cost sharing. The order includes information on actions insurers are advised, or required to take, including keeping residents informed about available benefits, telehealth options when possible, and expanding access to prescription medication refills.

- **NH Joint Information Center Offering Assistance to Local Emergency Management Directors, First Responders**

The New Hampshire Joint Information Center has reached out to local emergency management directors, and police and fire chiefs, in order to provide coordinated assistance and information around COVID-19. The JIC will serve as an information hub, streamlining the process of keeping our local partners informed.

COVID-19 Cases in New Hampshire as of 3/10/2020

New Hampshire 2019 Novel Coronavirus (COVID-19) Summary Report (updated March 11, 2020, 9:00 AM)

Number of Persons Confirmed ¹	2
Number of Persons Presumptive Positive, awaiting CDC confirmation ²	3
Number of Persons with Test Pending in PHL ³	11
Number of Persons Tested (closed, tested negative)	74

Because COVID-19, and all respiratory illnesses, are most commonly spread through respiratory droplets, residents should take the same precautions as those recommended to prevent the spread of influenza:

- Stay home and avoid public places when sick (i.e. social distancing)
- Cover mouth and nose when coughing and sneezing
- Wash hands frequently
- Avoid being within 6 feet (close contact) of a person who is sick
- Avoid sharing drinks, smoking/vaping devices, or other utensils or objects that may transmit saliva
- Disinfect frequently touched surfaces
