

eWIC is coming to New Hampshire!

2018 is the year New Hampshire WIC participants will be able to buy foods using an electronic benefit transfer card called eWIC. The eWIC card will replace the paper vouchers that are now used. The eWIC card will work just like a debit card at the store. Your family will be issued an eWIC card by your local WIC agency. All of the foods for your whole family will be together on one card. Staff will explain how the card works. This will make the shopping experience easier and faster for WIC families and for vendors.

The NH WIC Program is developing new resources to explain how to use the eWIC card. Updates will be added to this web page when those materials become available.

We expect to have eWIC available throughout the state by late Fall 2018.
