

# **JULY eWIC Update**

## **Integrated Vendors**

The state will be conducting Electronic Cash Register (ECR) system certifications for the pilot vendors starting July 18<sup>th</sup>, 2018. Please reach out to your corporate office or ECR system provider to ensure your system is ready.

## **Non-Integrated Vendors**

The stores in the statewide rollout that will be using a stand beside device will receive the Conduent agreement packet in August. This packet includes the eWIC Vendor ID that was assigned to your store by the New Hampshire WIC program. This eWIC Vendor ID number is how transaction data is compiled for payment processing to stand beside (non-integrated) vendors.

Just a reminder, stores using a stand beside device must return the Conduent agreement packet to Conduent prior to the POS devices being sent to the store. The POS devices are normally sent out two weeks prior to implementation. Once the POS device is received, training will be scheduled for your store. Please note that you must have a working analog phone line or wired internet connection prior to training.
