

A recent survey conducted by the NH Department of Health and Human Services (DHHS) identifies Independent Pharmacies in New Hampshire that do not sell tobacco products. DHHS applauds these pharmacies for putting the health of their clientele and patients ahead of sales. The survey, conducted by phone in August, 2015, asked the 33 Independent Pharmacies in New Hampshire if tobacco products were sold in their stores – of those who answered the question, 27 said no.
