ACHIEVEMENTS

- Partnership with the Concord Connections Coalition and the Early Childcare and Education Director's Roundtable.
- Hired new staff member with a focus in community engagement, collaboration, and communications.
- Worked with NAMI NH to support youth suicide prevention activities. Our efforts have been focused on cultivating an engaged youth suicide prevention implementation team and fostering more collaborative relationships with key stakeholders.
- Conducted numerous trainings on suicide prevention, including those for law enforcement officers, media recommendations and safe messaging, and online training.
- Attended the Youth Suicide Prevention Assembly meetings where we share case studies and relevant presentations.
- Supported the Concord Adverse Childhood Experiences Response Team for the past four years and secured grants to support this important community-level work.
- Received a three-year Trauma Responsive Community grant through New Hampshire Children's Health Foundation. We have partnered with Pear Associates to conduct an environmental scan.is.

CHALLENGES

- Connecting with schools virtually wasn't always possible, and not all were willing to allow us to come in person.
- Staff turnover.

LOOKING AHEAD

- Connecting with new partners
- Reengaging with schools and students
- By working within school-based systems of care, such as MTSS-B, we hope to bring the "Getting to Y" program which empowers students to take control of their Youth Risk Behavior Survey data and create real change in their communities.
- Facilitating consistent, high-quality opportunities for community partners to connect and collaborate more intentionally.
- Promoting health equity
- Reducing the impact of stigma
