BEHAVIORAL RISK FACTOR SURVEILLANCE SYSTEM (BRFSS)

SECTION 1 – OVERVIEW AND SCHEDULE OF EVENTS

SECTION 1. OVERVIEW AND SCHEDULE OF EVENTS

1.1. Introduction

The New Hampshire Department of Health and Human Services, Division of Public Health Services (Department) is seeking responses to this Request for Proposals (RFP) from qualified Vendors to provide the collection of uniform, state-specific data on New Hampshire (NH) adults' health-related risk behaviors, chronic health conditions, and use of preventive services. The selected Vendor must employ cross-sectional telephone surveys to propagate data, with technical and methodological assistance provided by the Centers for Disease Control and Prevention (CDC). The Department anticipates awarding one (1) contract for the services in this RFP.

1.2. Project Overview/Justification

The mission of the Department is to ensure the health and well-being of communities and populations in New Hampshire by promoting and protecting the physical, mental and environmental health of its citizens, by preventing disease, injury, disability and death, and preparing for public health emergencies.

To ensure the health and well-being of communities and populations in New Hampshire, the Department, in collaboration with all of the states in the United States and participating US territories and the Centers for Disease Control (CDC), administers the Behavioral Risk Factor Surveillance System (BRFSS). The BRFSS is administered and supported by CDC's Population Health Surveillance Branch, under the Division of Population Health at CDC's National Center for Chronic Disease Prevention and Health Promotion.

The BRFSS is the nation's premier system of health-related telephone surveys that collect state data about U.S. residents, aged 18 and older, regarding their health-related risk behaviors, chronic health conditions, and use of preventive services. Established in 1984 with 15 states, BRFSS now collects data in all 50 states as well as the District of Columbia and three U.S. territories. The BRFSS completes more than 400,000 adult interviews each year, making it the largest continuously conducted health survey system in the world. New Hampshire has been conducting the BRFSS since 1986. The information collected by the BRFSS is not available from other sources.

The NH BRFSS is designed to generate statistically valid estimates of NH residents' health-related risk behaviors, chronic health conditions, and use of preventive services. The BRFSS questionnaire is designed and approved by a working group of BRFSS state coordinators and CDC staff. A typical BRFSS questionnaire has three parts: 1) the core component, consisting of the fixed core, rotating core, and emerging core; 2) optional modules; and 3) state-added questions. All health departments must ask the core component questions without modification in wording, however, the modules are optional.

The fixed core component is a standard set of questions asked by all states that includes questions on demographics, current health behaviors such as tobacco use, and seatbelt use. The rotating core is made up of two distinct sets of questions, each asked in alternating years by all states, addressing different topics. In the years that rotating core topics are not used, they are supported as optional modules. The emerging core questions typically focus on "late breaking" issues. These questions are part of the core for one year and are evaluated during or soon after the year concludes to determine their potential value in future surveys.

The State will use a scoring scale of 650 Points. Points will be distributed as set forth in the table below.

communications between the parties or contract negotiations, must be available until a contract is approved by G&C, or, if the contract does not require G&C approval, until the contract has been actually awarded. This means unsuccessful Vendors will not be notified of the outcome until that time.

Confidential, commercial or financial information may be exempt from public disclosure under RSA 91-A:5, IV. If a Vendor believes any information submitted in response to this request for application should be kept confidential, the Vendor must specifically identify that information where it appears in the submission in a manner that draws attention to the designation and must mark/stamp each page of the materials that the Vendor claims must be exempt from disclosure as "CONFIDENTIAL." Vendors must also provide a letter to the person listed as the point of contact for this RFP, identifying the specific page number and section of the information you consider to be confidential, commercial or financial and providing your rationale for each designation. Marking or designating an entire proposal, attachment or section as confidential must neither be accepted nor honored by the State. Vendors must also provide a separate copy of the full and complete document, fully redacting those portions and must note on the applicable page or pages that the redacted portion or portions are "confidential."

Pricing, which includes but is not limited to, the administrative costs and other performance guarantees in Proposals or any subsequently awarded contract must be subject to public disclosure regardless of whether it is marked as confidential.

Notwithstanding a Vendor's designations, the State is obligated under the Right-to-Know law to conduct an independent analysis of the confidentiality of the information submitted in a proposal. If a request is made to the State by any person or entity to view or receive copies of any portion of the proposal, the State must first assess what information it is obligated to release. The State will then notify you that a request has been made, indicate what, if any, information the State has assessed is confidential and will not be released, and specify the planned release date of the remaining portions of the proposal. To halt the release of information by the State, a Vendor must initiate and provide to the State, prior to the date specified in the notice, a court action in the Superior Court of the State of New Hampshire, at its sole expense, seeking to enjoin the release of the requested information.

By submitting a proposal, Vendors acknowledge and agree that:

a. The State may disclose any and all portions of the proposal or related materials which are not marked as confidential and/or which have not been specifically explained in the letter to the person identified as the point of contact for this RFP;

5.6. Electronic Posting of Resulting Contract

As such, the Secretary of State provides to the public any document submitted to G&C for approval, and posts those documents, including the contract, on its website. BEHAVIORAL RISK FACTOR SURVEILLANCE SYSTEM (BRFSS) APPENDIX F DOIT INFRASTRUCTURE & SECURITY

APPENDIX E: DOIT INFRASTRUCTURE & SECURITY

- 1. The Project will be conducted in cooperation with the New Hampshire Department of Information Technology (DoIT). DoIT coordinates the statewide Information Technology activities.
- 2. Technical Architecture
 - 2.1. Components of the State's technical architecture include:

2.1.1.State Network Environment

2.1.1.1. The State of New Hampshire operates a Metropolitan-Area-Network (MAN) in the City of Concord, NH using a combination of leased and owned fiber optic cable. State of New Hampshire locations outside of the Concord, NH main facility are connected via multiple wide-area Networks using various technologies including Carrier Ethernet Services (CES), Microwave Wireless and Virtual Private Networks (VPN) Tunnels over the Internet. State Networks have varying levels of integration and connectivity to the statewide core for resource sharing and centralized administration by the State of Information Technology (DoIT). State agencies connect to the State's central core Network location in Concord to facilitate access to Email, the Internet, and the State's financial Applications. Direct support is provided for twenty-one partner agencies; other State agencies support their own Networks, out-source the support, or use the resources of another agency.

2.1.2.Internet Access

2.1.2.1. The State of New Hampshire has purchased thru American Registry for Internet Numbers (ARIN) its own External IP Address Range and Autonomous System Number. The State advertises its External IP Space and Autonomous System Number to two different Internet Service Providers so as to provide failover in the event of a single Internet Service Provider (ISP) Network failure.

2.1.3.VMware

2.1.3.1. The State uses VMware for Windows Server virtualization and virtual hosts are deployed at two separate State campus sites. VMware provides a highly scalable and high availability environment for the State's many Agencies. If a virtual host fails, VMware automatically fails over all of the virtual Servers on that host to another host. The EMC Networker product is used to manage backups for this environment utilizing Data Domain as the disk to disk repository.

2.1.4.Oracle

2.1.4.1. For the State's Oracle enterprise systems, an Oracle/Linux solution (OVM) is used for the virtual environment. Similar to the windows environment, this Solution provides a highly scalable and high availability environment and also utilizes the EMC Networker and Data Domain backup solution. Data Domain is also employed to meet the backup requirements within OVM.

2.1.5. Future Systems Environment

2.1.5.1. Future design and development efforts should conform to the emerging environment as defined by the New Hampshire Statewide Strategic Information Technology Plan.

APPENDIX F DOIT INFRASTRUCTURE & SECURITY

This environment is end user centric, utilizing the Internet and Web whenever possible, promoting electronic transactions, and centralized common services (security, e-Commerce), where possible.

2.1.6. Security

- 2.1.6.1. The State must ensure that appropriate levels of security are implemented and maintained in order to protect the integrity and reliability of its information technology resources, information, and services. State resources, information, and services must be available on an ongoing basis, with the appropriate infrastructure and security controls to ensure business continuity and safeguard State Networks, Systems, Data and other assets.
- 3. The State will evaluate the degree to which the proposed System is designed and architected to ensure compliance with Exhibit I Example Contract And Exhibits Exhibit K: DHHS Information Security Requirements.

INSTRUCTIONS FOR CERTIFICATION

By signing and submitting this grant agreement, the prospective primary participant is providing the certification set out below.

The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant must submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation must disqualify such person from participation in this transaction.

The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

The prospective primary participant must provide immediate written notice to the DHHS agency to whom this grant agreement is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549: 45 CFR Part 76. See the attached definitions.

The prospective primary participant agrees by submitting this grant agreement that, should the proposed covered transaction be entered into, it must not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.

The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

2022-057 - Electronic Asset Verification System

APPENDIX I: EXAMPLE CONTRACT AND EXHIBITS (For Reference Only – do not complete)

A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

Nothing contained in the foregoing must be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.
